

The Arysta LifeScience Product Portfolio for Soybeans

At Arysta LifeScience, our goal has always been to bring you products that add true value to your business. Our portfolio for the soybean market offers integrated solutions that can help take you successfully from planting to harvest.

Rancona Summit SEED TREATMENT

A high-performance, ready-to-use seed treatment featuring two powerful fungicides to control both seed- and soil-borne diseases in soybeans for maximum yield potential.

Shadow 3EC HERBICIDE

SHADOW® 3EC is an efficient, concentrated post-emergent herbicide for controlling volunteer corn and tough grass in broadleaf crops.

FORTIX FUNGICIDE

A highly systemic, fast-acting strobilurin combined with the longest-lasting triazole for season-long fungicide benefits with one early application and total application flexibility — apply by ground or by air. Also provides suppression of Sudden Death Syndrome (SDS) in soybeans.

Zolera FX FUNGICIDE

A heavy-duty combination fungicide with two active ingredients delivered at full rates for maximum performance and yield in soybeans. Preventative and curative activity, with residual soil activity for root-to-tip protection. Excellent choice for managing White mold.

Evito FUNGICIDE

A highly advanced, highly systemic foliar fungicide with quick uptake and residual soil activity that delivers long-lasting disease control and plant health benefits in soybeans. In-furrow application controls soil-borne fungal pathogens like Rhizoctonia root and stalk rot.

Dimilin 2L INSECTICIDE

An economical insect growth regulator that controls a broad spectrum of yield-robbing insect pests, and is easy on beneficials. When applied at R3, DIMILIN 2L showed consistent yield increases over untreated acres.

Application Rates and Timing

Usage Chart

	RECOMMENDED APPLICATION RATE	DISEASES/PESTS CONTROLLED
RANCONA® SUMMIT	4 fl oz/100 lb seed	Seed rot, damping off and seedling blight including seed- and soil-borne <i>Fusarium</i> and <i>Sclerotinia</i> and seed-borne <i>Diaporthe (Phomopsis)</i> , <i>Rhizoctonia solani</i> and <i>Pythium</i> . General seed rots including those caused by saprophytic organisms such as <i>Penicillium</i> and <i>Aspergillus</i> . For enhanced <i>Phytophthora</i> protection, add Belmont 2.7 FS.
SHADOW® 3EC	4-10.67 fl oz/A	Volunteer barley, volunteer corn, barnyard grass, broadleaf signalgrass, brome, crabgrass, crowfoot grass, fall panicum, field sandbur, foxtail, goosegrass, itchgrass, lovegrass, ryegrass, shattercane, wild oats, wild proso millet, witchgrass, woolly cupgrass.
FORTIX®	5 fl oz/A	Suppression of Sudden Death Syndrome when sprayed at R1 or earlier. Frogeye leaf spot, Cercospora blight and Purple seed stain, Alternaria leaf spot, Anthracnose, Brown spot, Pod and stem blight, Powdery mildew, Rhizoctonia aerial blight, Rust, Sclerotinia stem rot (suppression), White mold (suppression).
ZOLERA™ FX	5 fl oz/A	White mold/Sclerotinia stem rot, Frogeye leaf spot, Cercospora blight and Purple seed stain, Asian soybean rust, Alternaria leaf spot, Anthracnose, Brown spot, Pod and stem blight, Rhizoctonia aerial blight, Rust, Powdery mildew.
EVITO®	2 fl oz/A	Alternaria leaf spot, Anthracnose, Brown spot, Cercospora blight, Frogeye leaf spot, Pod and stem blight, Rhizoctonia aerial blight, Rust, Rhizoctonia root and stalk rot, Southern blight. In-furrow: Seed- and soil-borne diseases such as Rhizoctonia root and stalk rot.
DIMILIN® 2L	2-4 fl oz/A	Velvetbean caterpillar, Mexican bean beetle, green cloverworm, beet armyworm, fall armyworm, soybean looper (suppression), grasshopper. Apply when insects first appear.
